

All **pak tanks** feature a *unitized* stainless steel tank- the heavy duty 304 grade stainless steel tank is a part of the frame and integral to structural strength and mounted stability. This system requires the accommodation of little framing hardware: a 3-point mount **pak tank** is essentially no larger than the volume it holds... *as close as we could get.*

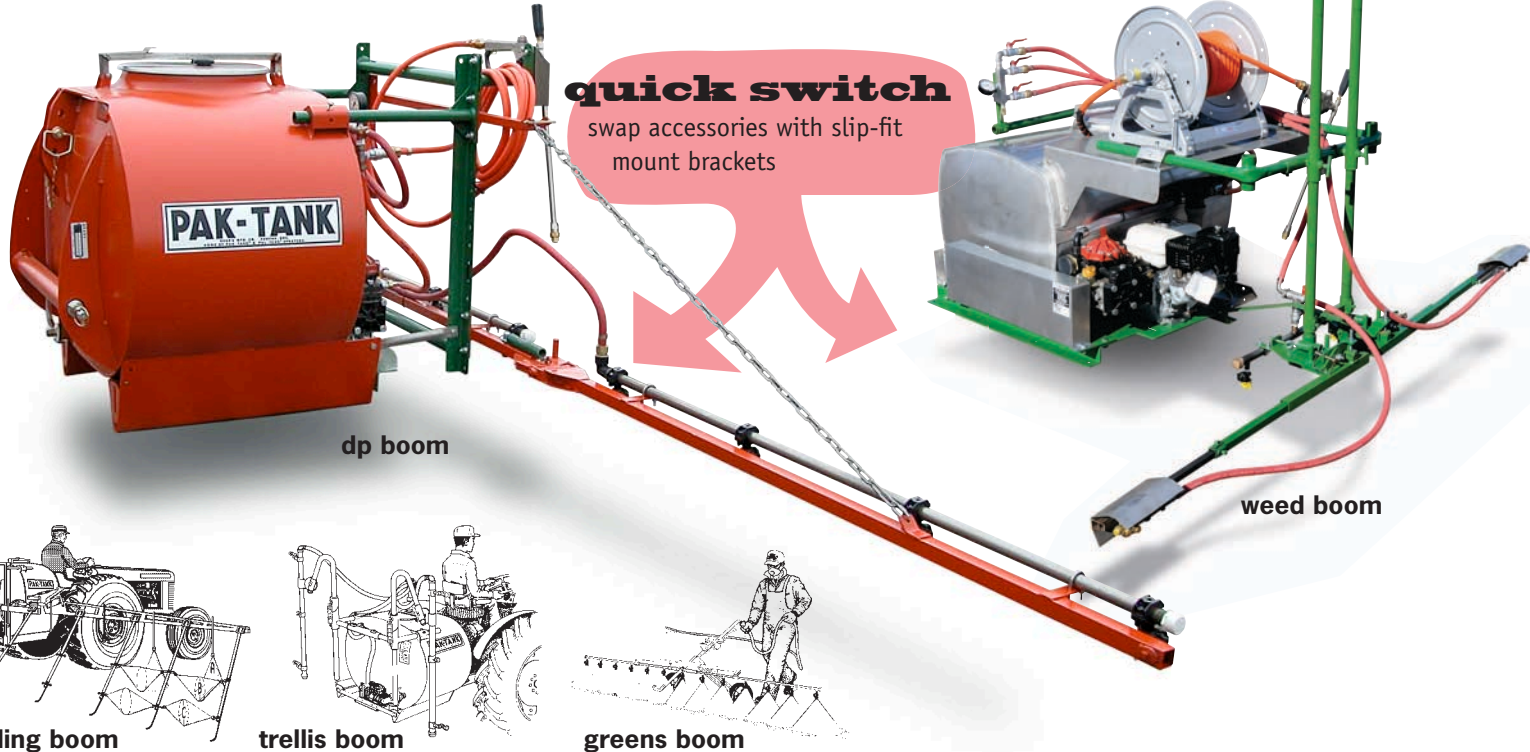

The tank and all tank fittings, the lid, the mechanical agitation system, and the suction assembly are made with non-porous stainless steel- from wettable powders to oil sprays, the **pak tank** rinses clean to handily move from one job to the next.

Tanks come in a variety of shapes and sizes, from 25 gallon utility sprayers to 2500 gallon nurse tanks- skinny & tall; fat & flat. The shape conforms to the restrictions of your environment. We have tanks with multiple chambers or tanks mounted in line for sequence processes.

*Clockwise from upper left corner- 200gal with AR503 pump, RMCO Boom; 100gal with AR30 pump; 50gal w/pump compartment, AR30 pump, Hannay hose reel; 300gal with AR50 pump, Nifty Boom, FoamMark; 100gal with AR30 pump, Orchard Weed Boom.*

1960s...  
still hard at work

**tanks** 304 Stainless Steel construction  
Select volume & tank profile for your application  
Cat I,II 3-point hook-up with all mount hardware  
Skid models with heavy wall tubular steel frame  
Integrated accessory mount brackets  
Multiple tank units available  
Quick fill tank head fitting available

**agitation** Stainless steel through-tank paddle agitation  
Lubricated agitator shaft bearings with packing seals  
Ball socket bearing mount for installation flexibility  
Jet booster and sparge tube systems optional

**tank fill** 15 1/2" filler opening with stainless steel lid  
Fill basket included  
Security latch and DOT safety lids available  
Air gap filler tube available  
Quick fill tank head fitting available

**monitor** Tank level sight gauge with safety shutoff  
2 1/2" dia. glycerine filled pressure gauge

**pump** Piston actuated diaphragm pumps 5-25 gpm  
Low pressure for booms, high pressure for guns  
Centrifugal, piston and roller pumps available

**power** Orchard tractor PTO  
Honda, Kohler, Briggs Vanguard, Onan engines  
Hydraulic motor calibrated for your tractor system

**bypass** Bypass valve allows low pressure return to tank when starting engine and aids solution mixing

**relief valve** High capacity valves with replaceable wear components  
Match valve range & rating to your application

**line strainer** Spraying systems suction line strainer  
Quick isolation for ease of access & cleaning

**hose reels** Rears and Hannay hose reels; manual or electric wind  
Hose guides and rollers available  
Pacific Echo, Kuriyama, Green Garde hose selection

**REARS**
